

Stuck-at-home kits: COVID-19 edition

Planet Superheroes!

CRIN

Choose an environmental issue and create a superhero with superpowers to fix it. Whether it's to combat deforestation, plastics in our oceans or food waste, this activity encourages children to design outside-of-the-box solutions to some of our most pressing issues.

First presented at the Tate Modern in 2019, this workshop gave rise to the likes of the Recycling Monster, the Multi-headed It, Protesters for Mother Earth, and Farty Girl!

In this kit, you will find:

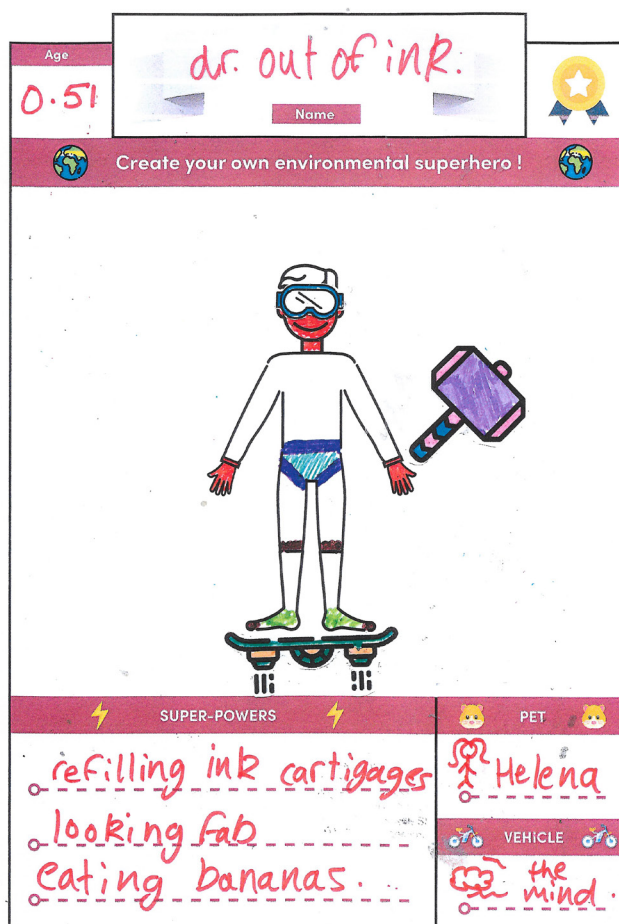

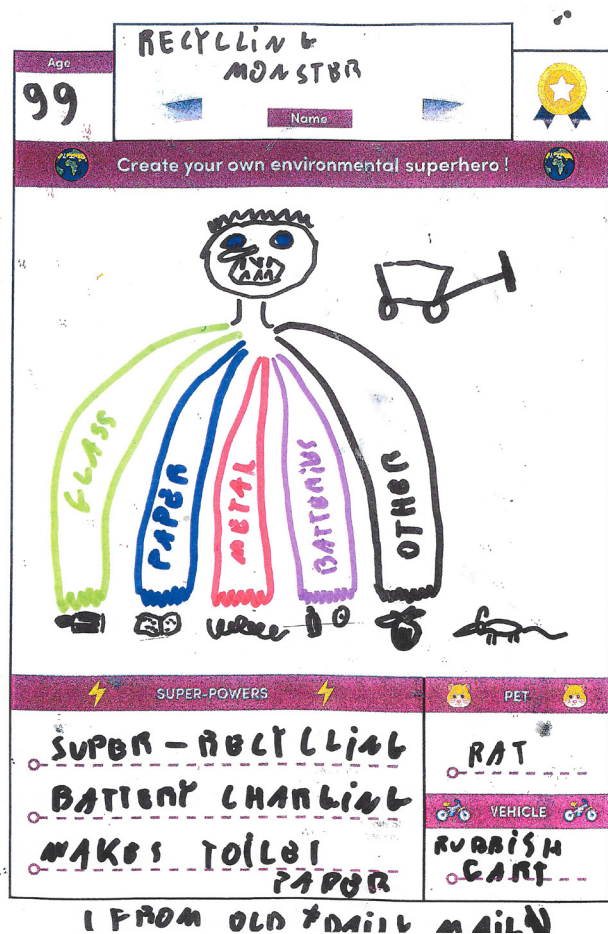

- Three superhero templates
- Some icons which you can cut & paste

For this you will need:

- Pencils, pens, markers, crayons
- Scissors
- Glue

You can photocopy this PDF & if you need more superhero templates or icons, simply photocopy after printing a version out (do NOT print double-sided!) Send us your superhero at contact@crin.org or tag us on Twitter @CRIN_wire or Instagram @crin_stagram!

Here are some examples of previous superheroes to inspire you:

Age 21

Name Aqua Girl ♡

Create your own environmental superhero!

Under the sea

plastic bags

plastic bottles

pet bottle caps

helmet that provides oxygen for 24 hrs

battery powered magic device that detects garbage & transforms them to fishes/sea creatures
